

WI24 ROCK POWDER

PROPERTIES

Rock powder, with fortifying, rebalancing and strengthening action for plants and soils. It is suitable for any type of soil.

APPLICATION

Use the **WIDDAR WI24 ROCK POWDER** product in this dosage: 500g (17.6 ounces) of product diluted in approx. 2 litres of water (0.5 gallons). Treat the **work tools to stimulate the formation of organic matter**. Repeat the treatment after 24 months.

STORAGE: Keep the product dry and well sealed. Keep out of the reach of children.

AVAILABLE IN: 3 kg (6.6 lbs), 5 kg (11 lbs), 10 kg (22 lbs), 25 kg (55 lbs) packs.

For information on the correct application in specific soil and climate conditions and cultivation methods, please contact our technical support office.

USAGE

Clean the tools with a pressure washer (preferably using hot water), and then carefully spray **the part of the tool that gets in contact with the soil**, once. The rock dust needs to be diluted in water in this dosage: **500 g (17.6 oz.) in 2 liters (0.5 gallons)**. **Filter and spray the product** using a clean spray nozzle. The effect of the impregnation will last 24 months.

The diluted product, if kept in a tightly closed container, will not expire.

NOTICE

Please note that the usage of the specific products on the plants and the soil needs to always be used within the whole **Trinium** agricultural method, otherwise they will not be effective. The products must also be contained and applied using barrels and pumps free of any residue of non-Widdar products. Barrels must be thoroughly washed with caustic soda or, alternatively, treated internally and externally with **WI21 ROCK POWDER** fortifier.

If it rains during the 3 hours following the application of Widdar products the effectiveness of the treatment is reduced by about 20%. If it rains within 2 hours the products will be ineffective and will have to be reapplied.
