

## W101 ROCK POWDER

### PROPERTIES

**Rock powder, with fortifying, rebalancing and strengthening action for plants and soils.** It is suitable for any type of cultivation or soil.

### APPLICATION

**WIDDAR W101 ROCK POWDER** is recommended to mitigate **STRESS, SUDDEN TEMPERATURE CHANGES, HAIL OR OTHER UNFAVOURABLE CLIMATIC EVENTS.**

To balance the conditions and strengthen the adaptive capacities of plants, apply 1 kg (2,2 lbs) **W101 ROCK POWDER** diluted in approximately 200-250 litres (50-65 gallons) of water for each hectare (2,5 acres). If possible, **apply as a preventative measure or immediately after**, better in the early morning. If necessary, repeat the treatment after 7 days for young or hardly formed plants, and every 10 days for adult plants. Same thing if thermal shocks are over 10°C.

**STORAGE:** Keep the product dry and well sealed. Keep out of the reach of children.

**AVAILABLE IN:** 3 kg (6.6 lbs), 5 kg (11 lbs), 10 kg (22 lbs), 25 kg (55 lbs) packs.

For information on the correct application in specific soil and climate conditions and cultivation methods, please contact our technical support office.

### USAGE

Rock powder can be diluted in two ways:

- Pour the powder in the sprayer barrel in this dosage: 1 kg/ha (2.2 lb./2.5 acres) to which you add 200/250 litres (50-65 gal.) of water. After about 30 minutes, the product will be ready to be sprayed.
- In the event of clogged sprayer nozzles, or excessive wear of the pump's bearings, pour the powder into a bucket, add 10/15 (2.64-4 gallons) litres of water, stir 2-3 times and after about 30 minutes, pour the solution into the sprayer barrel using a suitable filter. Lastly, add the rest of the water.

Please note that the diluted solution does not expire when kept in a tightly closed tank.

### NOTICE

Please note that the usage of the specific products on the plants and the soil needs to always be used within the whole **Trinium** agricultural method, otherwise they will not be effective. The products must also be contained and applied using barrels and pumps free of any residue of non-Widdar products. Barrels must be thoroughly washed with caustic soda or, alternatively, treated internally and externally with **W121 ROCK POWDER** fortifier.

*If it rains during the 3 hours following the application of Widdar products the effectiveness of the treatment is reduced by about 20%. If it rains within 2 hours the products will be ineffective and will have to be reapplied.*

AVERAGE MINERALOGICAL ANALYSIS		OTHER CHARACTERISTICS	
QUARTZ	20-40%	MOISTURE	<5%
CALCITE	5-30%	pH	6,5-7%
SODIUM FELDSPAR	5-35%		
POTASSIUM FELDSPAR	5-30%		
OTHER	5-20%
