

W01 STARTER FERTILIZER

FEATURES AND BENEFITS

Hydrosoluble formulation based on magnesium sulphate suitably enriched, activated and boosted using the Trinium* method for the initial fertilization and soil preparation. **It promotes the response of subsequent treatments even when the soil is deeply worked and/or in the presence of strong electromagnetic fields.**

Since the nutrients are readily soluble in water, they are easily available to plants. The product is effective on all soil types, regardless of their pH values.

The special preparation of this fertilizer, which has been enriched and enhanced with the Trinium method, gives the product the **ability to activate the organic matter generation process in the soil, thus providing a strengthening action on soils and plants.**

The innovative formulation of these products allows you to use them according to the dosages recommended by the Widdar line.

APPLICATION

Dissolve 1 Kg (2.2 lbs) in water and water each hectare of soil with a fine spray (1kg/ha – 2.2lbs/2.5 acres). Use 200-250 litres (50-65 gallons) of water per hectare for optimal distribution.

RECOMMENDATIONS FOR USE

Stir vigorously in clean water.

Please note that the diluted solution does not expire when kept in a tightly closed tank.

CAUTION

Please note that the use of these specific products for plants and soil must always be as part of the Trinium agricultural method, otherwise they will not be effective. The products must also be contained and applied using tanks and pumps free of any residue from other **non** Widdar products. To this end, tanks must be washed with caustic soda, or, alternatively, treated internally and externally with **W121 ROCK POWDER** fortifier.

STORAGE: Keep the product dry and well sealed. Keep out of the reach of children.

AVAILABLE IN: 3 kg (6.6 lbs), 5 kg (11 lbs), 10 kg (22 lbs), 25 kg (55 lbs) packs.

If it rains during the 3 hours following the application of Widdar products the effectiveness of the treatment is reduced by about 20%. If it rains within 2 hours the products will be ineffective and will have to be reapplied.

CHEMICAL ANALYSIS		PARTICLE SIZE ANALYSIS	
MgSO ₄	% 49	mm	%
K ₂ SO ₄ , KCl, NaCl, CaSO ₄	% 0,1	<1	65
H ₂ O of crystallization % 50.9			
pH (solution 5% at 25°C) ~ 8		Average diameter mm	
Maximum solubility at 20°C ~ 99kg in 100 liters of water		d ₅₀	0,8

The use of magnesium sulphate is allowed in organic farming under Reg. EC No 834/2007, 889/2008 and 1235/2008 and subsequent amendments and additions.
