

## WI22 ROCK POWDER

### PROPERTIES

**Rock powder, with fortifying, rebalancing and strengthening action for plants and soils.** It is suitable for any type of soil.

### APPLICATION

To rebalance the soil after having used **green manure on your crops**, use **WI22 ROCK POWDER** at the rate of 1 kg/ha (2.2 lbs) diluted in approx. 200-250 (50-65 gallons) litres of water. **Treat twice, allowing 10-15 days to go by in between treatments, starting immediately after the green manure.** If the **green manure** was made **with grass**, allow at least 10 days to go by after the first spray before re-sowing. If **maize/corn stalks** were chopped and buried underground, do not sow again until at least 30 days after the first treatment.

**STORAGE:** Keep the product dry and well sealed. Keep out of the reach of children.

**AVAILABLE IN:** 3 kg (6.6 lbs), 5 kg (11 lbs), 10 kg (22 lbs), 25 kg (55 lbs) packs.

For information on the correct application in specific soil and climate conditions and cultivation methods, please contact our technical support office.

### USAGE

Rock powder can be diluted in two ways:

- Pour the powder in the sprayer barrel in this dosage: 1 kg/ha (2.2 lb./2.5 acres) to which you add 200/250 litres (50-65 gal.) of water. After about 30 minutes, the product will be ready to be sprayed.
- In the event of clogged sprayer nozzles, or excessive wear of the pump's bearings, pour the powder into a bucket, add 10/15 (2.64-4 gallons) litres of water, stir 2-3 times and after about 30 minutes, pour the solution into the sprayer barrel using a suitable filter. Lastly, add the rest of the water.

Please note that the diluted solution does not expire when kept in a tightly closed tank.

### NOTICE

Please note that the usage of the specific products on the plants and the soil needs to always be used within the whole **Trinium** agricultural method, otherwise they will not be effective. The products must also be contained and applied using barrels and pumps free of any residue of non-Widdar products. Barrels must be thoroughly washed with caustic soda or, alternatively, treated internally and externally with **WI21 ROCK POWDER** fortifier.

*If it rains during the 3 hours following the application of Widdar products the effectiveness of the treatment is reduced by about 20%. If it rains within 2 hours the products will be ineffective and will have to be reapplied.*

| AVERAGE MINERALOGICAL ANALYSIS |        |
|--------------------------------|--------|
| QUARTZ                         | 20-40% |
| CALCITE                        | 5-30%  |
| SODIUM FELDSPAR                | 5-35%  |
| POTASSIUM FELDSPAR             | 5-30%  |
| OTHER                          | 5-20%  |

| OTHER CHARACTERISTICS |        |
|-----------------------|--------|
| MOISTURE              | <5%    |
| pH                    | 6,5-7% |
